

The Smarter Balanced Assessment System consists of three components: end-of-year **summative assessments** designed for accountability purposes, **interim assessments** designed to support teaching and learning throughout the year, and a suite of tools and resources in the Digital Library that support classroom-based **formative assessment practices**.

This document describes the interim assessments, including their purpose, use, and varieties. For each grade and subject, this document provides a list of all interim assessments available for the 2019–20 school year.

Types of Interim Assessments

Smarter Balanced offers different types of interim assessments based on the granularity of the content they assess.

Interim Comprehensive Assessments (ICAs)

measure similar content to the summative assessment and may be helpful for determining the knowledge and skills of students who are new to the district or the state. ICAs can also provide information about students' knowledge and skills after a significant period of instruction.

Interim Assessment Blocks (IABs) are assessments teachers can use throughout the school year to assess smaller bundles of content. They are intended to provide educators and students the ability to check where they are at that moment in time, and educators can use results to determine next steps for instruction. Since the IABs are more granular than the ICAs, educators can use IABs during the school year more consistently with the sequence of their curricula. Beginning in the 2019–20 school year, new focused IABs will assess no more than three assessment targets to provide educators with a more detailed understanding of student learning.

Each IAB is associated with a Connections Playlist that supports teachers in determining instructional next steps to help students based on their performance on the assessment. The playlists include links to instructional resources

in the Digital Library that support the formative assessment process by providing tools, resources, and instructional strategies to use in the classroom.

The ICAs and IABs draw from the same bank of items and performance tasks.

Features of Interim Assessments

- Flexible administration options better support local purposes.
- Items include all the accessibility resources available in the summative assessment to help provide accurate results for students.
- Student performance on Interim Comprehensive Assessments is reported on the same scoring scale as the summative assessment.
- They may be used to measure students' knowledge and skills in grade levels other than the students' enrolled grades.
- They include rigorous items that:
 - cover the range of Depth of Knowledge described in the Common Core State Standards (CCSS).
 - allows educators access to preview the test questions and their students' responses to the test questions as [part of educators' instructional process](#) to address students' relative strengths and needs for improvement.

INTERIM ASSESSMENTS AT A GLANCE

Interim Comprehensive Assessments

Assess the full range of targets, similar to the summative.

Examples:

- Grade 3 ELA
- Grade 3 Math

Interim Assessment Blocks

Assess 3–8 targets in Math or ELA/literacy.

Examples:

- Grade 3 ELA, *Reading Literary Texts*
- Grade 3 Math, *Operations and Algebraic Thinking*

Focused Interim Assessment Blocks

Assess 1–3 targets in Math or ELA/literacy.

Examples:

- Grade 3 ELA, *Text Analysis (Literary)*
- Grade 3 Math: *Multiply and Divide Within 100*

Using Interim Assessments

Interim assessments can serve a variety of educator needs. To better support the range of possible uses consistent with the policies of member education agencies, educators may establish the timeframe, administration policies, and scoring practices for interim assessments. However, interim assessments are not intended to be used for accountability purposes.

Standardized vs. Non-standardized Administrations

Interims can be administered in both [standardized and non-standardized ways](#) in the classroom. In a traditional, standardized administration, educators assign each student an interim assessment to take individually, and educators can use students' results as part of the formative assessment process. Educators can also use interim assessments for non-standardized administrations by displaying items to a class using a service provider's item viewer application for students to answer on paper, in small groups, or as a class discussion. Also in a non-standardized administration, educators can conduct instructional activities, such as eliciting evidence from students using white boards, incorporating peer feedback while administering brief writes or performance tasks, or using an item to set up students working in small groups.

Administering Interim Assessments

Both the ICAs and the IABs are administered online and use the same delivery software as the summative assessments. Members have the flexibility to re-administer interim assessments any number of times. These decisions should be made as part of a larger assessment context that includes the purpose of the interim assessment, how the interim assessment will be scored, and how the data from the interim assessment will be used to improve teaching and learning. Interim assessment reports can be generated from the Smarter Balanced or member-designated reporting systems.

The ICAs and IABs contain a number of overlapping items. Therefore, students who take the ICAs and IABs more than once, or who take both the ICAs and IABs in the same grade levels and content areas, may see the same items more than once. As more interim assessment items are available, the ICAs and IABs will have fewer overlapping items.

Teacher Hand Scoring

Most items in the interim assessments will be scored via the computer. However, there are some test questions that need to be hand scored. In mathematics, hand scoring is only required for performance tasks. In ELA, some constructed-response items and performance tasks, including the full write, require hand scoring. This is a local/state responsibility. The Smarter Balanced Teacher Hand-scoring System or a service provider hand-scoring system allows educators to score student responses using the same scoring rules as the summative assessment. Smarter Balanced provides hand-scoring training materials including rubrics and sample responses for use by educators who will score student responses. Hand scoring is a valuable professional development activity that provides educators with an understanding of the scoring process and the expectations for student learning. Hand scoring can help inform educators' instruction by better understanding students' strengths and weaknesses.

Interim Assessment Security

The interim assessments are considered student- and teacher-facing only. This designation provides educators the flexibility to access the test questions and their students' responses to the test questions. However, **interim assessments must not be publicly displayed or distributed outside the classroom** to ensure all educators can use the interim assessments as intended. Only authorized local educational agency staff and students should have access to the interim assessments. Finally, interim assessment items must **not** be copied into third party systems without the permission of Smarter Balanced. Without permission, such activity is a copyright violation.

	Interim Comprehensive Assessments (ICAs)	Interim Assessment Blocks (IABs)	Focused IABs
What they measure	ICAs measure a similar range of content as the summative assessments and assess similar claims, targets, and standards.	IABs assess 3–8 targets.	Focused IABs assess 1–3 targets.
Test format	ICAs are fixed-form tests.	IABs are fixed-form tests.	Focused IABs are fixed-form tests.
Kinds of test items	ICAs include the same item types and formats, including performance tasks, as the summative assessments.	IABs include the same item types and formats, including performance tasks, as the summative assessments.	Focused IABs include the same item types and formats as the summative assessments.
Reporting results	ICAs yield overall scale scores (on the same vertical scale), overall performance level designations, and claim-level information as the summative assessments. Claim-level information results are reported as “Below Standard,” “At/Near Standard,” and “Above Standard.”	Results are reported as “Below Standard,” “At/Near Standard,” and “Above Standard.”	Results are reported as “Below Standard,” “At/Near Standard,” and “Above Standard.”
Resources for next steps	Educators can search the Digital Library for relevant resources by filtering for a given grade level, subject, and claim. New for the 2019–20 School Year

New for ELA/Literacy

- Updated ICAs more closely align to the summative assessments.
- ICAs for grades 9 and 10 feature grade-appropriate cut scores.
- The grade 9 and 10 ICAs include the same items as the grade 11 ICA.
- 21 new focused IABs (three per grade).

New for Mathematics

- ICAs for grade 9 and grade 10 include content appropriate cut scores.
- The items in the grade 9 and 10 ICAs differ slightly to cover content appropriate for the grade.
- 21 new focused IABs (three per grade).
- Hmong and Somali translations glossaries added to all items in IABs and ICAs.
- New accessibility resource, the Illustration glossaries, added to all items in IABs and ICAs.
